

Le génie pour l'industrie

LASI

Computer System Architecture
Research Laboratory

Open Postdoctoral, PhD and MSc Positions

Postdoctoral, PhD and MSc positions are available at LASI. The research projects aim at developing new mechanisms for resource and service management in virtualized environments.

Keywords: Cloud computing, network virtualization, resource and service management, machine learning and optimization approaches.

We are seeking highly qualified and motivated candidates with the following profile:

- a) BSC, Master and PhD in software engineering, computer sciences or computer engineering,
- b) Very good knowledge in network and service engineering
- c) Very good knowledge in virtualization technologies, cloud computing and distributed systems
- d) Very good algorithmic design skills
- e) Very good programming skills (Java, C/C++, ...)

To apply, please send your application by email to Prof. Nadjia Kara (Nadjia.Kara@etsmtl.ca). The application should include CV, transcripts and a cover letter.
