

SERGE PAYETTE

IT has very few secrets for our superhuman Serge Payette. With a background in electronics and communications as well as management, Serge has a list of past experiences that took him from Montreal to Ottawa and all the way to the Barbados to implement WiFi networks. We have been fortunate enough to count him as one of us since May 2018, when he filled the position of Tech Manager, in charge of providing technical support to our clients, managing integration projects and more.
